

Risk Control

School of Risk Control Excellence (SORCE®)

Access world-class training and resources that can help minimize exposures and complement your risk management practices. CNA's SORCE® On Demand training gives you 24/7 access to our collection of risk control courses.

SORCE – Live Classroom Presentations & Webinars

Our industry-leading Risk Control staff is available to conduct live educational presentations and webinars for a number of cutting-edge risk management topics. Review the [SORCE Catalog](#) to see the available courses, then contact your local Risk Control Consultant or email riskcontrol@cna.com to inquire about a course.

SORCE On Demand

SORCE On Demand continues to offer our library of industry specific Risk Control courses. This series of online courses helps our customers in their efforts to train new employees, enhance operational productivity and limit exposures.

CNA's SORCE On Demand includes:

- Mobile-friendly access to courses and resources anytime, anywhere
- Complimentary short On Demand courses, including Driving in Today's World and New Employee Orientation (NEO) for Construction and General Industry, which contain more than 20 individual modules. Other eLearning courses are also available, including topics in Life Sciences, Technology and Manufacturing.

- OSHA 10 and 30 authorized safety training is available for a nominal fee to policyholders at a discounted rate

Our [SORCE On Demand](#) courses are accessible 24/7. The curriculum will be modified throughout the year as risks evolve.

Continuing Education (CE) Credits

We provide continuing education credits for select courses from institutions that recognize CNA's CE programs.

Course Registration

To request a SORCE course or webinar, please visit CNA Risk Control at cna.com/riskcontrol. Your CNA Risk Control Consultant can provide you with additional information on SORCE courses and help determine the course(s) best suited to your needs.

To learn more about how SORCE can help you manage your risks and increase efficiencies, please contact CNA Risk Control at RiskControl@cna.com or visit cna.com/riskcontrol.
